-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by **Kawashima** [6459236].

As to claim 2, Kawashima discloses in figures 1-9 an apparatus for regulating state of charge in a battery assembly including a plurality of secondary cells CE1-CE6 as unit cells which are connected in series, said apparatus comprising; voltage detecting means 400 for detecting respective voltages across said unit cells, and equalizing means for equalizing the respective voltages across said unit cells by transferring electric charge from the largest unit cell having the largest voltage across the cell to a capacitor CD1, and thereafter, by transferring the electric charge from said capacitor to the smallest unit cell having the smallest voltage across the cell, wherein said equalizing means transfers the electric charge from said largest unit cell to said capacitor so that the voltage of said capacitor may be made higher than the voltage across said largest unit cell [see the title; column 3, lines 1-23; column 6, lines 4-24; column 8, lines 61-67; column 9, lines 1-12; column 12, lines 24-38].

As to the method claim 1: the method steps will be met during the normal operation of the apparatus described above.

Art Unit: 2838

Allowable Subject Matter

4. Claims 3 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

As to claims 3 and 4: none of the references of record prior to applicant's filing date discloses, teaches, or suggests an apparatus for regulating state of charge in a battery assembly including a plurality of secondary cells as unit cells which are connected in series, said apparatus comprising, *inter alia*, the equalizing means connects said largest unit cell to said capacitor by way of a voltage converter.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited in PTO-892 and not mentioned above disclose related apparatus.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Pia Tibbits whose telephone number is (571) 272-2086. If unavailable, contact the Supervisory Patent Examiner Mike Sherry whose telephone number is (571) 272-2084. The Technology Center Fax number is (703) 872-9306.
